

**In-stock Heat Exchangers Keep You Cool**

**Thermal Transfer Products**  
An API Heat Transfer Company

SunSource stocks a complete range of mobile coolers, so we're ready when you are. Thermal Transfer Products' MAR Series cooler is a standard product that our customers depend on.

With Tier 4 engine packages getting larger there is less space available for required systems. The aluminum MAR Series cooler is more compact than a traditional steel cooler, yet does not sacrifice durability, while generating the best heat rejection and minimizing pressure drop.

**Features**

- IP68 rated 12 vdc motor
- #8 temperature sensor port
- Internal 60 PSI bypass relief
- Bar and plate construction
- Standard SAE ports
- Welded fittings and manifolds

**Available Units**

- MAR-12-211567
- MAR-18-211169
- MAR-32-209341
- MAR-48-212905
- MAR-232-210594
- MAR-248-210605

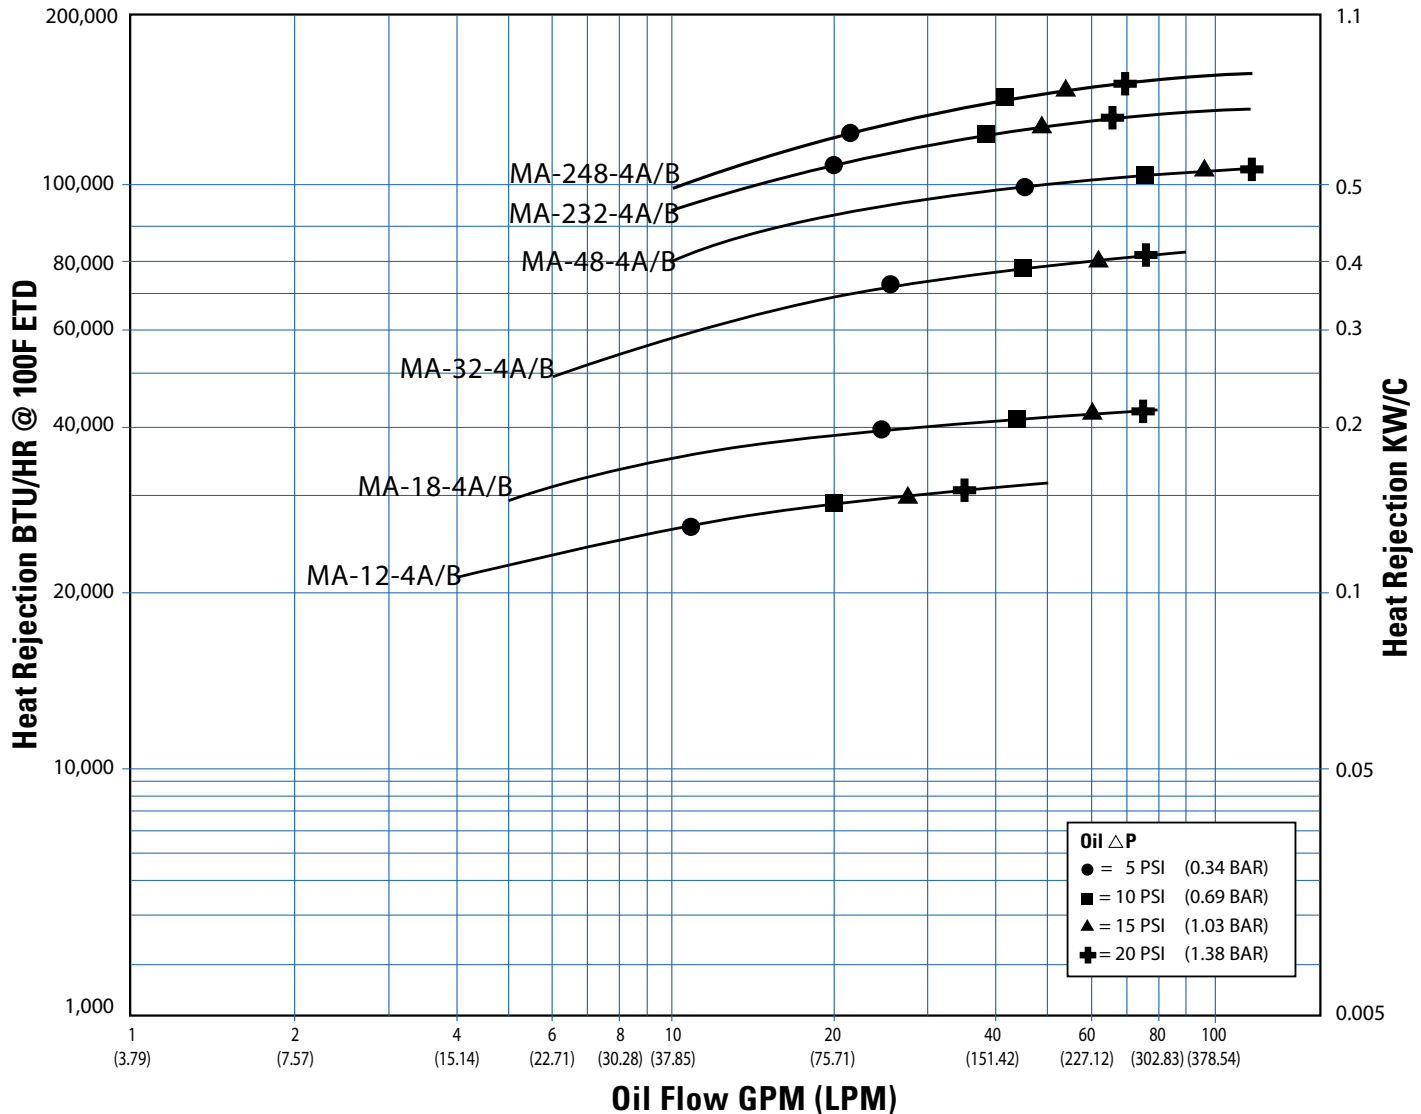

The SunSource Cooling Group can provide performance curves for each specific application. Thermal Transfer Products' MAR series provides a replacement for AKG, ASA, Emmegi, Hydac, and Olaer. Contact us today.
